1 Who We Are

The *Apache Xerces™ Project* operates on a meritocracy: the more you do, the more responsibility you can obtain. This page lists all of the people who have gone the extra mile and are Committers or members of the Project Management Committee. If you would like to get involved, the first step is to join the [community mailing lists](#) for the project(s) which interest you.

We ask that you please do not send us e-mails privately asking for support. We are non-paid volunteers who help out with the project and we do not necessarily have the time or energy to help people on an individual basis. Instead, we have set up mailing lists which often contain hundreds of individuals who will help answer detailed requests for help. The benefit of using mailing lists over private communication is that it is a shared resource where others can also learn from common mistakes and as a community we all grow together.
